#### REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

#### HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

### NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES Executive Director & Civil Registrar-General

> MARCELO M. ORENSE Assistant Executive Director

#### **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

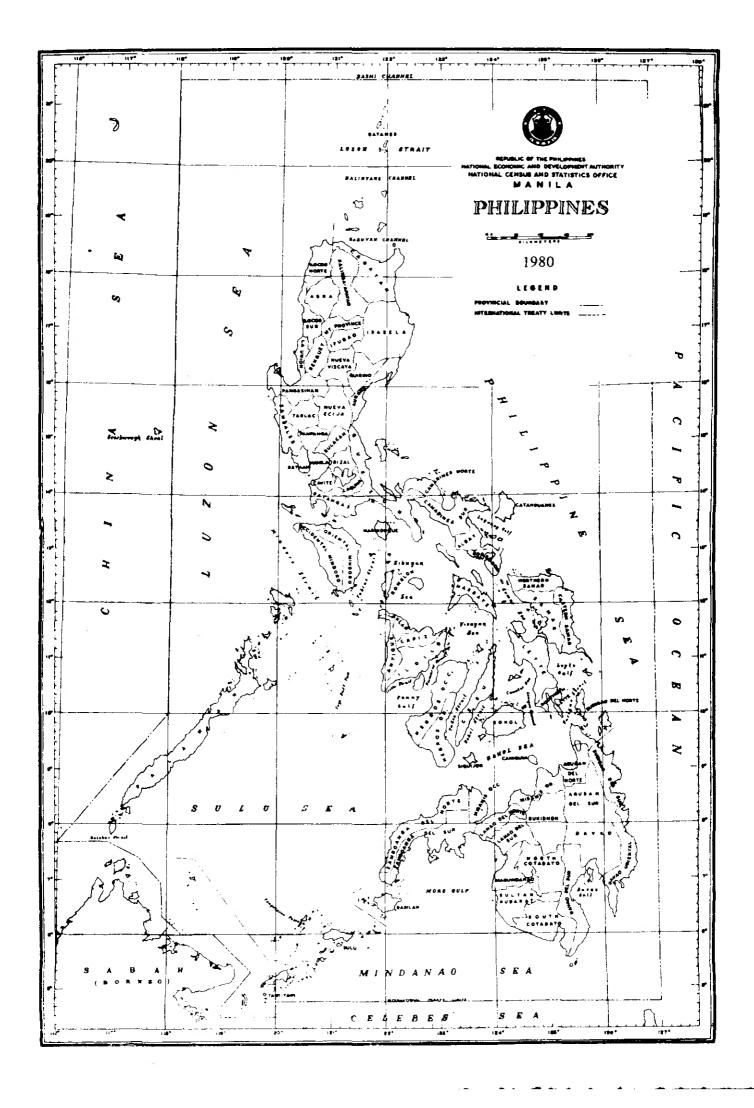

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

## **Explanatory Text**

#### **GENERAL**

#### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In 30 doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censul year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

#### INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MOH, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MEC, are representatives from the MHS, EPRS-NEDA, POPCOM, UPPI, MEC, are representatives fr

and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill

their data needs.
As early as August 1977, an NCSO Technical Committee for censuses was created.

As early as August 1977, an ACSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing on census and the Sub-Committee on Operations and Logistics Support, were directly charged

with the preparatory work for the census undertaking.

#### **CENZIZ BOYRDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Boards while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

#### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

#### METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

#### PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

#### POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

#### CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

#### **DEFINITION OF TERMS AND CONCEPTS**

#### I - POPULATION

#### **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

#### URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation:
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month:
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishing.

All areas not falling under any of the above classifications are considered rural.

#### PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
  (2) in mental hospitals;
  (3) in leprosaria or leper colonies; and
  (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

#### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

#### PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

#### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

#### LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

#### RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

#### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

#### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

#### **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

#### LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

#### HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

#### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

#### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

#### BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

#### The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural — any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

#### **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

#### CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

#### CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

#### NUMBER OF ROOMS IN THE DWELLING UNIT

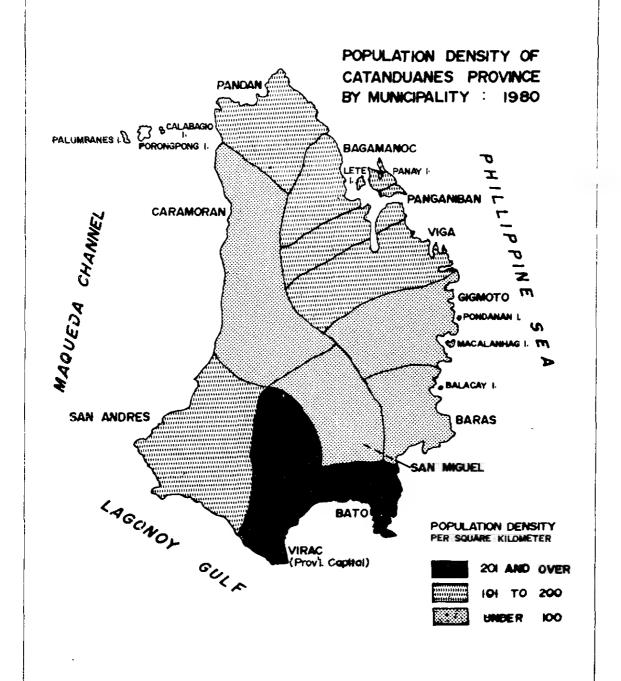

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

ŧ.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

#### FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

## Catanduanes: A Brief Analysis

The main island of Catanduanes and a number of smaller islands, the largest of which are Panay, Palumbanes, Porongpong and Calabagio, compose the province of Catanduanes. Located 40 miles northeast of Legaspi City, across 'agonoy Gulf, Catanduanes lies virtually isolated in the Pacific Ocean. Exposed to the trop cal storms that frequently batter places along the typhoon belt, the province has often been called "Isle of the Eastern Sea" and "Land of the Howling Winds". It has a land area of 1,511.5 square kilometers, representing about 0.5 percent of the country's total land area.

Catanduanes is composed of eleven municipalities with Virac as the provincial capital.

#### **POPULATION**

As of May 1, 1980, Catanduanes had a total population f 175,247, an increase of 2,467 or 1.43 percent over the 1975 population and an annual geometric growth rate of 0.28 percent. Corresponding to the same increase, roughly equivalent to 1 6 persons for each square kilometer of the province, the population density changed from 114.3 to 115.9 persons per square kilometer.

The province is still predominantly rural with 76.78 percent of the populace residing in rural areas and 23.22 percent in urban areas. Of the total males 22.32 percent are urban residents and 77.68 percent, rural dwellers. Less than a fourth of the females (24.16%) live in the urban areas and 75.84 percent, in rural localities. Table A cords the numbers and percentages of the population, male and female, in urban and rural areas.

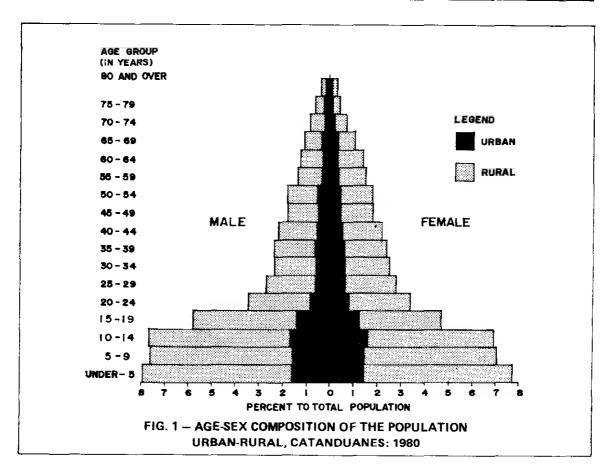

The males had always outnumbered the females in the last 10 years, registering sex ratios (number of males for every 100 females) of 102.38 in 1970,  $10 \cdot .79$  in 1975 and 102.95 in 1980. The dominance of males lay in the rural areas during the period under review (1970 - 103.54; 1975 -106.20 and 1980 - 105.44). In contrast, urban areas registered more females than males for a sex ratio of 95.11 which was more pronounced than the 1970 and 1975 sex ratios of 97.13 and 99.10, respectively.

From the group of persons under five years of age through the 80 years old and above, the rural male and female populatic decrease as a group becomes older. Hence, they form a pyramid-like structure with broad bases of each formed by persons below five years old and the apex by those 80 and above. On the other hand, the urban male and female population divert from the pyramid configuration as the age group 10-14 years exceed those 5-9 years of age.

A BRIEF ANALYSIS

TABLE A - URBAN-RURAL POPULATION BY SEX,
CATANDUANES: 1970, 1975 AND 1980

Area Classification	19	80	19	75	1970		
and Sex	Number	Percent	Number	Percent	Number	Percent	
Total	175,247	100.00	172,780	100.00	162,302	100.00	
Male	88,896	50.73	88,412	51.17	82,104	50.59	
Female	86,351	49.27	84,368	48.83	80,198	49.41	
Urban	40,699	23.22	33,341	19.30	28,625	17.64	
Male	19,840	11.32	16,595	9.61	14,104	8.69	
Female	20,859	11.90	16,746	9.69	14,521	8.95	
Rural	134,548	76.78	139,439	80.70	133,677	82.36	
Male	69,056	39.41	71,817	41.56	68,000	41.90	
Female	65,492	37.37	67,622	39.14	65,677	40.46	

#### AGE COMPOSITION

Children below 15 years old comprise 44.92 percent of the population, a figure lower than those in 1970 and 1975. The number of individuals of working age (15 to 64 years old) increased by 0.34 percentage point as against the increase of 1.88 percentage points in 1970-1975. Adults 65 years of age and over rose by 1.19 percentage points from 4.21 to 5.40 percent over the past five years.

A sharp contrast is noted in the age composition of the urban and rural population, particularly in children below 15 years of age and the working age group. Of the total urban residents, 40.42 percent are 0-14 years old; 52.47 percent, 15-64; and 7.11 percent, 65 years and over. Among the rural people, 46.28 percent are in the ages 0-14; 48.84 percent, 15-64 and 4.88 percent, 65 and over (Table 3).

Dependency ratio (number of dependents for every 100 persons in the productive age group) of the province has decreased from 102.67 to 101.28. There was a wide gap in the dependency ratio between the urban and rural areas. With a ratio of 90.59, the urban sector was by far better off than the rural sector which had 104.75.

Shown in the succeeding table is the broad-age distribution of the population since 1970:

TABLE B – AGE COMPOSITION OF THE POPULATION, CATANDUANES: 1970, 1975 AND 1980

Age	19	80	197	75	1970		
Composition	Number	Percent	Number	Percent	Number	Percent	
Total	175,247	100.00	172,780	100.00	162,302	100.00	
0-14 years	78,715	44.92	80,257	46.45	78,524	48.38	
15 – 64 years	87,068	49.68	85,253	49.34	77,025	47.46	
65 years and over	9,464	5.40	7,270	4.21	6,753	4.16	

#### **MARITAL STATUS**

Of the population 10 years of age and over, 45.91 percent were single and 49.28 percent were married. In 1970, the never married exceeded the married by 1.63 percentage points. However, the number of married persons had increased at a rate faster than that of the unmarried persons and the gap had narrowed down in 1975. During the last five-year period, the widowed and the divorced or separated hiked, respectively, to 4.26 percent and 0.38 percent, the reverse of their trend from 1970 to 1975. Only 0.17 percent did not reveal their marital status.

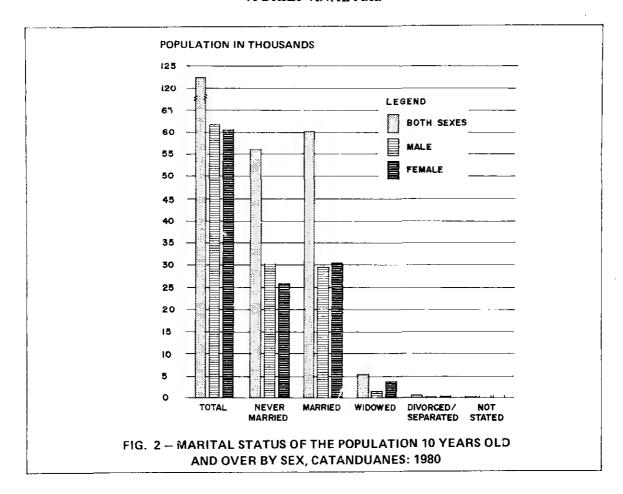

Males showed a trend toward singlehood; females, a tendency to be married. Already the majority in 1970 at 51.48 percent of the total males, the proportion of never married

men climbed yet higher to 52.24 percent in 1975 but decreased to 49.18 percent in 1980. On the other hand, the proportion of married men declined from 46.13 percent in 1970 to 45.57 percent in 1975, but up to 47.97 percent in 1980. Married females exceeded the never married in 1970, 47.74 percent against 45.61 percent and in 1975, 48.93 percent against 45.36 percent. By 1980, 50.61 percent of the women were married and only 42.58 percent were single. Females were more likely to be widowed and divorced or separated than males. About six out of every 100 women were widowed (6.20%) and 0.42 percent divorced or separated, as compared respectively with two out of every 100 (2.36%) and 0.34 percent for men (Table 4).

The accompanying table classifies the population 10 years old and over by marital status and sex in the last three censal years:

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, CATANDUANES: 1970, 1975 AND 1980

Sex and	198	30	197	75	197	70
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	122,110	100.00	118,419	100.00	108,273	100.00
Never married	56,068	45.91	57,866	48.86	52,577	48.56
Married	60,174	49.28	55,917	47.22	50,811	46.93
Widowed	5,200	4.26	4,391	3.71	4,421	4.08
Divorced/separated	463	0.38	224	0.19	325	0.30
Not stated	205	0.17	21	0.02	139	0.13
Male	61,721	100.00	60,330	100.00	54,336	100.00
Never married	30,352	49.18	31,519	52.24	27,974	51.48
Married	29,610	47.97	27,493	45.57	25,063	46.13
Widowed	1,457	2.36	1,228	2.04	1,135	2.09
Divorced/separated	209	0.34	84	0.14	114	0.21
Not stated	93	0.15	6	0.01	50	0.09
Female	60,389	100.00	58,089	100.00	53,937	100.00
Never married	25,716	42.58	26,347	45.36	24,603	45.61
Married	30,564	50.61	28,424	48.93	25,748	47.74
Widowed	3,743	6.20	3,163	5.44	3,286	6.09
Divorced/separated	254	0.42	140	0.24	211	0.39
Not stated	112	0.19	15	0.03	89	0.17

#### HIGHEST GRADE COMPLETED

Persons whose formal schooling did not go beyond the elementary level composed 64.17 percent of the private household population 7 years of age and over, 3.59 percentage points lower than the 1975 proportion. This decline was not at all an indication of a decreased educational attainment in the province, but of larger numbers and proportions of the population who went on to high school and college.

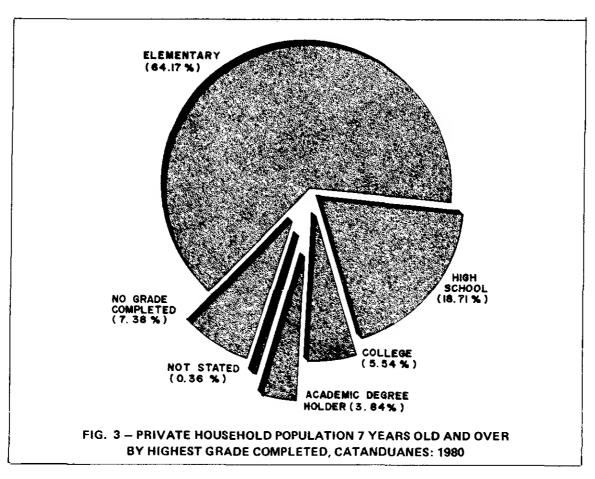

Although only 18.71 percent were reported to have reached the secondary level, the figure represented a 2.76 percentage points increase over 1975. Those with unfinished college education as well as those who earned academic degrees, respectively, increased by 1.59 and 1.15 percentage points (Table D). Largely made up of 7 years-old whose enrolment were deferred so they could always be available for farm work, persons who did not complete any grade dropped from 8.86 to 7.38 percent. Similarly, those whose educational attainment was not reported decreased from 0.79 to 0.36 percent.

More than one-third of those schooled only in the elementary level went as far as the sixth and seventh grades (35.93%). Only 14.35 percent attained the fifth grade and nearly twenty percent (19.49%), the fourth grade. First to third graders constituted 30.23 percent. Less than three-fourths (71.14%) of those who proceeded to high school did not go beyond third year while 28.86 percent completed the senior year. Out of every 100 college undergraduates, barely 15 attended fourth year or higher (14.84%); the other 85 completed any of the lower collegiate years (85.16%).

The following table gives the distribution of the private household population 7 years old and over by highest grade completed for two censal years:

TABLE D — PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, CATANDUANES: 1975 AND 1980

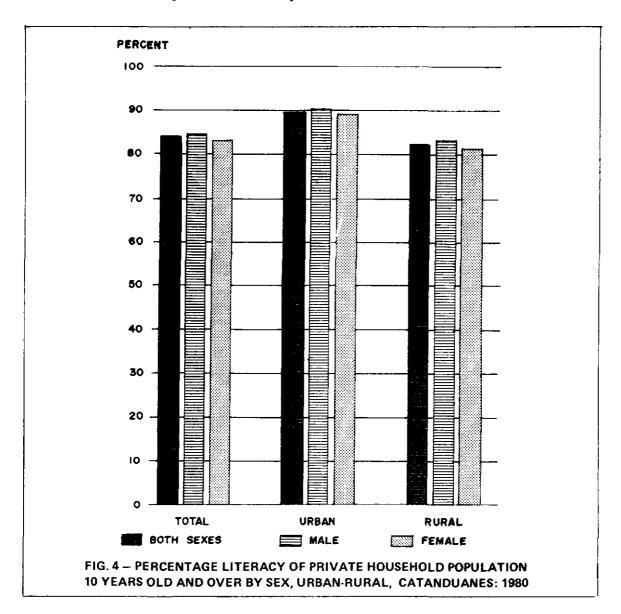

Highest Grade Completed	198	80	1975		
	Number	Percent	Number	Percent	
Total	137,469	100.00	134,855	100.00	
No grade completed	10,141	7.38	11,951	8.86	
Elementary	88,216	64.17	91,380	67.76	
High school	25,718	18.71	21,502	15.95	
College	7,613	5.54	5,324	3.95	
Academic degree hoider	5,279	3.84	3,628	2.69	
Not stated	502	0.36	1,070	0.79	

#### LITERACY

Of the 121,983 private household population 10 years old and over, 84.02 percent were literate. Overall, the male literacy rate (84.84%) was slightly higher than that of females (83.18%).

Marked differentials in literacy rate prevailed between urban (89.85%) and rural areas (82.12%). The male literacy rates -90.68 percent in urban and 83.08 percent in rural areas - were consistently higher than their female counterparts. The corresponding figures for females were 89.09 percent and 81.09 percent.

#### LANGUAGE OR DIALECT

Distinctively the principal dialect in both urban and rural areas, Bicol is generally spoken by 99.60 percent of the total private households. The remaining 0.40 percent

generally speak one of the following dialects: Tagalog, Lineyte-Samarnon (Waray), Ilocano, Cebuano, Maguindanao, Gaddang, Belgian and English. In two municipalities — Baras and Gigmoto — no other language or dialect is spoken except Bicol, while in 7 municipalities the dialect is generally spoken in more than 99 percent of the respective households (Table 7).

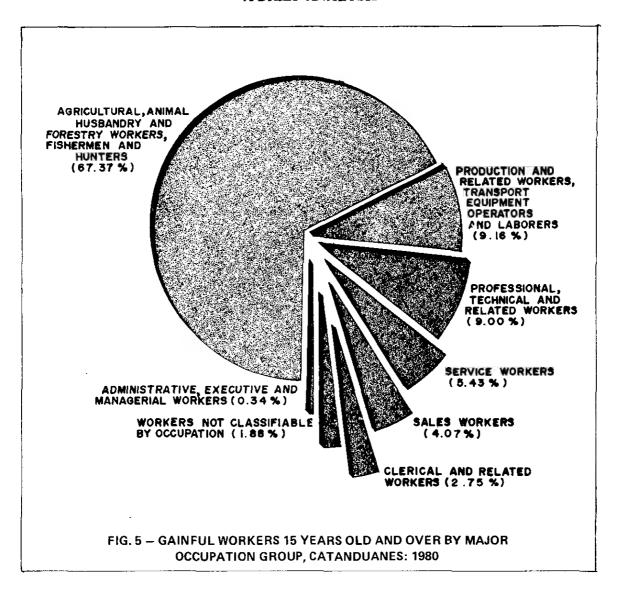

#### **GAINFUL OCCUPATION**

Out of 96,411 persons 15 years of age and over, 44,386 have gainful occupations. Over the past five years, the predominance of agricultural, animal husbandry and forestry workers, fishermen and hunters diminished from 69.30 percent to 67.37 percent of the total gainful workers. Decreases are likewise noted in the following major occupation groups: production and related workers, transport equipment operators and laborers, from 10.20 to 9.16 percent; service workers, from 5.56 to 5.43 percent; sales workers, from 4.49 to 4.07 percent; and administrative, executive and managerial workers, from 0.51 to 0.34 percent. These declines consequently resulted to gains for three other major occupation groups. Professional, technical and related workers increased 1.61 percentage points to 9.00 percent; clerical and related workers rose to 2.75 percent and workers whose occupations are unclassifiable, to 1.88 percent (Table 8).

The following table records the composition of the working population 15 years old and over by gainful occupation since 1975:

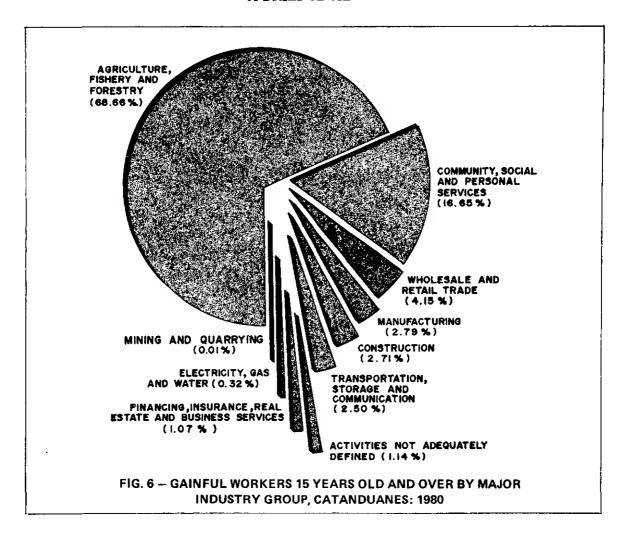

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, CATANDUANES: 1975 AND 1980

Major Occupation	19	980	19	75
Group	Number	Percent	Number	Percent
Total	44,386	100.00	42,969	100.00
Professional, technical and				
related workers	3,993	9.00	3,175	7.39
Administrative, executive and				
managerial workers	150	0.34	218	0.51
Clerical and related workers	1,223	2.75	911	2.12
Sales workers	1,807	4.07	1,931	4.49
Service workers	2,410	5.43	2,388	5.56
Agricultural, animal husbandry and forestry workers, fishermen				
and hunters	29,905	67.37	29,778	69.30
Production and related workers, transport equipment operators				
and laborers	4,064	9.16	4,381	10.20
Workers not classifiable by occupation	*	1.88	187	0.43

#### **INDUSTRY**

Agriculture, fishery and forestry account for 68.66 percent of all gainful workers. Nearly ninety percent of the workers (89.91%) in this dominant major industry group are engaged in agricultural crop production. Workers in fishery make up 8.82 percent; in agricultural services, 0.70 percent; in the production of livestock, poultry and other animals, 0.32 percent; and forestry, 0.01 percent. Ranking second, with a share of 16.65 percent of all workers, the community, social and personal services industry group provides three leading sources of jobs in the areas of education services (46.29%), personal and household services (29.22%) and public administration and defense (13.65%). Merely 4.15 percent are into wholesale and retail trade. Manufacturing employs 2.79 percent; construction, 2.71 percent; transportation, storage and communication, 2.50 percent and financing, insurance, real estate and business services, 1.07 percent. Electricity, gas and water, and mining and quarrying have the smallest shares of workers at 0.32 and 0.01 percent, respectively, while workers in activities not adequately defined total 1.14 percent (Table 9).

#### **MIGRATION**

Catanduanes barely felt the movement of its private household population 5 years old and over during the past 5 years; 96.45 percent of the males and 96.10 percent of the females lived in the same municipality where they had resided on May 1, 1975. Of those who had a different place of residence in 1975, less than two percent (1.95%) were residents of another province and 1.50 percent, of another municipality within Catanduanes. Residents of foreign countries made up only 0.27 percent. Changes of residence from another province and within the home province occurred mostly among females. Among migrants from abroad, however, the males outnumbered the females (Table 10).

#### TYPE OF BUILDING

A great majority (97.10%) of the 29,890 households occupy single houses. Others live in duplex (0.91%), apartment/accesoria/row house (0.10%), improvised structures such as barong-barong (1.35%), commercial/industrial/agricultural buildings (0.45%) or in other housing unit (0.05%). Private households living in hotel, lodging house, dormitory, etc. and in institutional buildings such as hospital, convent, etc. make up a combined total of only 0.04 percent (Table 1).

Households living in single houses are predominantly rural — more than three-fourths (76.88%) are in rural areas and the rest (23.12%), in urban areas. Of the 22,840 rural households, 97.69 percent occupy single houses. The same type of building shelters 95.19 percent of the urban households. The urban and rural areas record respective shares of 64.58 and 35.42 percent of the total households in duplexes. Apartment/accesoria/row house/etc. are entirely occupied by urban households while improvised structures are mostly occupied by rural households (92.35%).

The following table shows the changes in the housing conditions undergone by Catanduanes during the past decade:

TABLE F -- NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, CATANDUANES: 1970 AND 1980

Toma of Doubling	198	30	197	70
Type of Building	Number	Percent	Number	Percent
Total	29,890	100.00	26,213	100.00

school dormitory, etc.)	5	0.02	-	_
Other collective living quarters				
(military camp, etc.)	_	_		_
			•	

#### TYPE OF OCCUPANCY

A big bulk of the households (88.96%) own the dwelling units they occupy. Ownership of occupied dwelling units differ greatly by area, 91.21 percent and 81.67 percent for the rural and urban, respectively. Households enjoying rent-free dwelling units make up 5.94 percent. A few (4.91%) are tenant/lessee and 0.19 percent, subtenant/sublessee (Table 1).

#### CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Dwelling units roofed with strong materials (galvanized iron,/aluminum tile/concrete/brick/stone and asbestos) are occupied by 27.12 percent of all households. Majority of the households live in units with roofs made of light materials such as cogon/nipa (69.08%), anahaw, etc. (3.61%) and makeshift/salvaged materials (0.19%).

The largest proportion of households lives in dwelling units with outer walls of wood/plywood (60.05%). Over one-tenth (12.05%) occupy units walled with mixed tile/concrete/brick/stone and wood/plywood; 2.88 percent, with tile/concrete/brick/stone; 0.38 percent, with galvanized iron/aluminum and 0.07 percent with asbestos. Nearly one-fourth or 24.57 percent of the households live in dwelling units with outer walls of light materials (cogon/nipa, 18.11%; bamboo/sawali, 4.74%; makeshift/salvaged materials, 0.58%; and other, such as anahaw, 1.14%). Both urban and rural areas, particularly the former, have high percentages of households sheltered in units with walls of strong materials, 85.01 percent and 72.48 percent, respectively (Table 2).

#### YEAR BUILT

Nearly one-third of the households (32.68%) occupy dwelling units constructed during the past five years (1976-1980); 29.86 percent, during 1971-1975 and 21.21 percent, 1961-1970. Households in dwelling units erected in 1951-1960 constitute 10.79 percent and those in 1942-1950, 2.37 percent. About 3.09 percent of the households live in dwelling units built before the war (1941 or earlier).

#### FLOOR AREA OF DWELLING UNIT

More than half (52.05%) of the total households in Catanduanes occupy dwelling units with floor area of less than 30 square meters. One-third or 33.72 percent dwell in 30-49 square-meter units; 7.41 percent, 50-69 square meters; and 3.91 percent, 70-99 square meters. The remaining 2.91 percent live in more spacious dwellings—100 square meters and over (Table 3).

#### . TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Majority of the households (84.33%) that own the dwelling units they occupy are at the same time owners of the land where the structures are constructed. Merely 4.75 percent are lessee or sublessee and 2.06 percent, farm lessee/agricultural tenant of landowner. Only 2.18 percent are of other legal tenure while 6.68 percent have no tenure (squatters, etc.) at all (Table 4).

#### SOURCE AND USE OF WATER SUPPLY

For each of all three uses – drinking, kitchen use and washing clothes – the faucet, community water system is the chief source of water supply in the province. The proportion of households depending on this vary according to use – 56.95 percent for drinking, 53.41 percent for kitchen use and 35.99 percent for washing clothes. Less than a quarter or 23.84 percent of the total households depend on tubed/piped deep and shallow wells for drinking, 24.45 percent for kitchen use and 18.79 percent for washing clothes. About 11.52 percent utilize water from spring for drinking. 10.82 percent for kitchen use and 11.38 percent for washing clothes. Water from dug well is used, respectively, by 6.72 percent, 9.64 percent and 6.50 percent. However, 27.29 percent still depend on lake, river, stream, etc. for washing clothes although the same source is used by only 0.97 percent for drinking and 1.68 percent for kitchen use. Utilized neither for drinking nor kitchen purposes, rain water is used only for washing clothes by an insignificant number of households (0.05%) (Table 6).

#### KIND OF LIGHTING FACILITIES

Kerosene illuminates the dwelling units of 76.67 percent of the total households. Over one-fifth (21.95%) use electricity and 1.33 percent, liquefied petroleum gas (LPG). No household lights its dwelling unit with oil. A negligible 0.05 percent, all located in the rural areas, use other kinds such as candle and wax. Kerosene is widely popular in both urban and rural localities. Slightly more than half (50.45%) of the urban households and 84.76 percent of the rural households use this kind of lighting facility. On the other hand, a higher percentage of urban households (48.84%) use electricity as compared with 13.65 percent of the rural households (Table 5).

#### **COOKING FUEL**

Wood or charcoal, with which 92.65 percent of the total households cook their food, are used by 90.45 percent of the urban and 93.33 percent of the rural households. Only 3.83 percent of the forme and 5.54 percent of the latter, use kerosene. Merely 1.66 percent of the urban households use electricity; 3.92 percent, liquefied petroleum gas and 0.14 percent, other kinds. Among the rural households, only 0.47 percent use electricity; another 0.47 percent, liquefied petroleum gas and 0.19 percent, other kinds (Table 8).

#### **TOILET FACILITIES**

Water-sealed toilets are by far the most common in the rural localities and more so in the urban areas. Overall, the water-sealed toilet is used by 43.51 percent of the total households distributed according to depository as follows: 21.36 percent, sewer/septic tank and 22.15 percent, other depository. Only 9.18 percent use the closed pit; 10.14 percent, open pit; and 1.01 percent, other types (pail system, etc.). More than one-third or 36.16 percent have yet to provide themselves with toilet facilities.

Urban households have better toilet facilities than their rural counterparts. Slightly more than half (50.85%) of the urban households use water-sealed, sewer/septic tank and nearly one-fourth (24.28%), water sealed with other depository. Approximately 6.28 percent use closed pit; 3.80 percent, open pit; and 0.36 percent, other types. Among the rural households, 12.25 percent use water-sealed, sewer/septic tank; 21.50 percent, water-sealed, other depository; 10.08 percent, closed pit; 12.10 percent, open pit; and 1.21 percent, other. Households without toilet facilities constitute 14.43 percent in the urban and 42.86 percent in the rural areas (Table 7).

#### OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Of the total households, 48.89 percent own radios; 0.48 percent have television sets and 2.48 percent, refrigerators/freezers. Among the urban households, 60.35 percent own radios; 0.78 percent have television sets and 6.27 percent, refrigerators/freezers. Of the rural households, 45.35 percent have radios; 0.39 percent, television sets and 1.31 percent, refrigerators/freezers (Table 9).

Comparatively, the standard of living has improved for most of the households in Catanduanes. In 1970, only 30.14 percent owned radios; 0.11 percent had television sets and 0.77 percent, refrigerators. Ownership of these appliances was likewise higher among urban than rural households — 48.60 percent and 26.12 percent respectively, had radios. Owners of television sets made up 0.21 percent of the urban and 0.09 percent of the rural households and those who owned refrigerators, 3.07 percent and 0.26 percent, respectively.
